## MIDI COMMANDS OF HERCULES DJCONTROL INPULSE 300

The DJ controller has a MIDI input virtual port and a MIDI output virtual port to

- send controls to MIDI software
- receive status changes from MIDI software.

### **MIDI Input commands**

Input commands are the commands the DJ controller sends to the DJ software.

### **MIDI Output commands**

Output commands are the commands the DJ software sends to the DJ controller, to change LED status.

### **Hexadecimal format**

MIDI commands hereafter are in hexadecimal format. With software using MIDI decimal values, convert commands & values in decimal value.

### **How to read the commands**
