

How can I select the input type (VGA, RGB or Dvi) of connected to the Prophetview 920DVi?

As it is impossible to use several sources simultaneously, you must select l'input type that you wish to activate.

Procede as follow:

- Press the OSD menu button.
- Navigate to the Input Selection icon
- Select the appropriate input type (DVI, RGB or VGA)

The display will then adapt then on the selected video source.
