

How can I verify that the Smart TV Satellite card has been installed correctly on my computer?

You can check that it is the case from Windows Device Manager:

- Right click on **MY COMPUTER** icon on your desktop and select **Properties**
- If you are using Win 98 or ME: Select the **Device Manager** tab
- If you are using Win 2000 or XP: Select the **Hardware** tab, then click on the **Device Manager** button

You should normally get the following elements

NOTE: Other computer peripherals may also install **USB Composite Device** or **USB Human Interface Device** (joystick or webcam for example), so you may have more than displayed above.
