## How can I verify that my DJ Console RMX is correctly installed on my MAC computer?

Once installed, the DJ Console RMX should normally be enumerated by System Profiler (**Application / Utilities**):

The DJ Console will also be present in **Audio/MIDI SETUP** (Application > Utilities):

Under Audio Devices, the RMX should appear as both **Hercules DJ Console RMX** and **Hercules DJ Console RMX Aggregate Device.**

This is normal and necessary for DJ software to use all the outputs of the **DJ Console RMX**.

Under **MIDI Devices**, you should notice the **DJ Consoles RMX** as a device.
