How can I verify that my DJ 4Set is correctly installed on my MAC computer?

Once installed, the DJ 4Set should normally be enumerated by **System Profiler (Application > Utilities**):

The DJ Console will also be present in **Audio/MIDI SETUP** (also in **Applications >Utilities**):

- In OS X 10.6.x

Ð	Built-in Input 2 in/ 0 out	Ŷ	Hercules DJ 4Set Clock source: Default				(
۵	Built-in Output 0 in/ 2 out	≣ ↓)	Inpu	t Output			
Y	Hercules DJ 4Set 2 in/ 4 out	-		c output			
• 🕀	Hercules DJ 4SET Aggr 2 in/ 4 out	egate	Source: Default				*
			Format: 44100.0 Hz	z 🔹 2ch	-16bi	t	\$
			Ch Volume	Value	dB	Mute	Thru
			M ()				
			1 O				

- In OS X 10.5.x

Audio Input	Audio Output -		

Both **Hercules DJ 4Set** and **Hercules DJ 4Set Aggregate Device** should be present. This is normal and necessary for some DJ software to use all the outputs of the **DJ 4Set**.

Under **MIDI Devices**, you should notice the **DJ Consoles 4-MX** as a device.

should also appear on the

The **DJ Console Control Panel**, desktop

The **ABOUT** tab provides information about the drivers currently installed. If you ever need to contact our technical support, be sure to have this information at hand.
